Pulse O2DA Firearms Training, Inc. to Change Name, Expand Business

CHICAGO, Illinois — Pulse O2DA Firearms Training, Inc. (Pulse O2DA) announced today that it is changing its name to Distributed Security, Inc. (DSI).

The name change reflects the growing portfolio of services offered by Pulse O2DA and the evolving nature of its mission.

Since its founding in October 2010, the firm has developed an integrated offering of on-range, on-line and on-site training packages for individual, home, business, and community defense. The firm has grown to become one of the world's most comprehensive tactical training resources.

“Distributed Security, Inc. more accurately reflects our company’s turnkey, decentralized approach to private security,” said Bill Tallen, vice president tactical operations.

Coinciding with the name change, the firm is launching a new security offering, called Private Defense Networks. The new distributed security strategy will enable businesses to develop private defense bases and operate private security forces capable of defending life and property. DSI offers clients a turnkey package of services, including infrastructure, training, provisioning, and outsourcing.

The name change will gradually take effect throughout 2017. Existing Pulse O2DA brand names will be retained on various training offerings.

For more information, visit the new DSI web site at www.distributedsecurity.com.

Pulse O2DA is a private security firm training and mobilizing individuals, teams and units to defend life and property. The firm was founded by Ron Danielowski, a former active duty Marine and security consultant operating in the Middle East, and Mike Smock, a competitive strategist and expert on maneuver theory.
